Art Unit: 1732

DETAILED ACTION

1. The rejection of claims 1-3 and 9-19 under 35 USC § 102(b) and the rejection of claims 1-3 and 9-19 under 35 USC § 102(e) set forth in the previous Office Action (mailed on 12 October 2005) have been overcome and are withdrawn. The new title has also been entered.

Response to Amendment

2. The declaration under 37 CFR 1.131 filed on 17 January 2006 under 37 CFR 1.131 is sufficient to overcome the Schmid et al (U.S. Patent Application Publication 2004/0147630 A1) reference.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Art Unit: 1732

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jang et al (U.S. Patent 6,401,002 B1) in combination with Shields et al (U.S. Patent 5,181,045 A) for the reasons of record.

Response to Arguments

6. Applicant's arguments filed on 17 January 2006 have been fully considered but they are not persuasive.

7. Applicant argues (pages 14 and 15) that Shields et al do not remedy the deficiency of Jang et al, namely causing a reaction that keeps the colorant near a surface of the object. Examiner responds that Shields et al teach "crashing" or precipitating a colorant out of a material, which will keep a colorant near a surface of a formed object (note page 8, lines 1-18 of the instant specification). While Shields et al may also be concerned with a different problem (i.e., preventing or reducing the mixing of two different ink colors at a common border of the two inks), this does not in any way diminish the

Art Unit: 1732

teachings of Shields et al, and one of ordinary skill in the art would look to Jang et al and Shields et al for teachings on how to provide an object having a desired color.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
